**EXAMINER'S AMENDMENT** 

1. An examiner's amendment to the record appears below. Should the changes

and/or additions be unacceptable to applicant, an amendment may be filed as

provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST

be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

Claims 23-34 have been canceled.

COMMENTS

The claims directed to the nonelected inventions have been canceled.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Applicant's Remarks with respect to the rejection under 35 U.S.C. 112, second paragraph have been noted. Limitations similar to those recited in dependent claim 18 have been incorporated into independent claim 1, which now recites an "insulating adjustment plate comprising a plurality of windows corresponding to a plurality portions of the object to be plated." This limitation still

Application/Control Number: 09/681,712

corresponding to portions of a particular workpiece.

Art Unit: 1742

relates the structure of the apparatus to the object (workpiece) to be processed by the apparatus. The limitation is interpreted to require a plurality of windows which correspond to a plurality of portions of any workpiece that the apparatus is adapted to plate. It is not seen as being limited to a particular configuration of windows

Page 3

The prior art of record does not disclose of suggest metal plating apparatus with the source material connected to a first terminal of a power supply and an object to be plated connected to a second terminal, and which includes the recited combination of the pair of conductive perforated plates and the insulating adjustment plate. As indicated in the previous office action, the Alkire et al patent discloses metal plating apparatus with conductive perforated electrode plates 110 and 114 which are electrically connected to each other through bus 112. Neither Alkire et al nor the other cited prior art suggests the additional inclusion of an

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

insulating adjustment plate with a plurality of windows disposed between the object

and the conductive perforated plate on the side of the object as now recited.

Application/Control Number: 09/681,712

Art Unit: 1742

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Uzoh et al patent (6,261,426) is directed to a method and apparatus for enhancing the uniformity of electrodeposition or electroetching. The

apparatus includes an insulating plate 8 with a plurality of openings positioned

Page 4

between the workpiece and the counter-electrode. See figure 1.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William T. Leader whose telephone number is 571-272-1245. The examiner can normally be reached on Mondays-Thursdays and alternate Fridays, 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King, can be reached on 571-272-1244. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
